

## Liquid and Vapor Phase Carbon Vessels

**ESD Waste<sup>2</sup>Water, Inc.**'s Liquid and Vapor Phase Carbon Vessels offer a wide variety of options for removal of hydrocarbons or chlorinated solvents from liquid or vapor processes. ESD offers standard vessels with vapor flows to 4,000 CFM and liquid flows to 200 GPM. Additionally, ESD engineers can design a custom vessel and media for any application. Please contact our sales department with any questions.

### Standard Features:

- Steel, fiberglass or 5052 H32 marine grade aluminum construction
- Access ports for carbon change out
- Wide variety of media engineered for your requirements

### Available Options:

- Stainless steel construction
- High vacuum or pressure vessels
- High vacuum or high pressure switches
- Vacuum or pressure transmitters
- Custom hose sets
- Carbon change out

Thank you for allowing ESD to provide a solution to your equipment needs.
